INDUSTRIAL DISPUTES, JUNE QUARTER 1969

This bulletin contains statistics of industrial disputes for the quarter ended 30 June 1969. In addition, analyses of disputes by workers involved (directly or indirectly) and by total working days lost for the years 1966, 1967 and 1968 are shown in Tables 4 and 5.

The statistics of industrial disputes refer only to disputes involving a stoppage of work of ten man-days or more. The Australian figures include disputes occurring in the Northern Territory and the Australian Capital Territory. Workers indirectly involved are employees thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. For the estimated loss in wages shown in Table 2, any discrepancies between totals and the sums of industry groups are due to rounding.

An industrial dispute occurring in more than one State is counted as a separate dispute in each State. A dispute involving workers in more than one industry group in a State or Territory is counted once only in the number of disputes - in the industry group that has the largest number of workers involved; but workers involved, working days lost and estimated loss in wages are allocated to their respective industry groups. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. Disputes not settled at the end of a quarter are not counted in the number of disputes for the following quarter, but additional workers involved and working days and wages lost are included.

For further information about these statistics see Labour Report No. 52, 1965 and 1966.

TABLE 1. INDUSTRIAL DISPUTES : AUSTRALIA

Period	Number	Workers involved			Working days lost		Estimated loss in wages (\$'000)
		Directly	Indirectly	Total	Number	Average per worker involved	
1964	1,334	528,817	16,811	545,628	911,358	1.67	8,561
1965	1,346	460,234	14,810	475,044	815,869	1.72	8,198
